

**METAL MARKERS and ANTI SPLIT PLATES FOR
SANS 1288, 753, 754 and 457 PRODUCT**

The above Standards specify the requirements of the metal markers and anti-split plates used as attachments to the relevant treated product.

- 1) Material: Mild steel
- 2) Thickness:
Anti-split plates: 1,2mm minimum
Marking tags: 0,5mm minimum
- 3) Galvanizing: class Z275 as per SANS 3757
Total both sides together 275gr/m² average.

Non compliance of said metal products will result in the non compliance of the end product e.g. transmission poles.

In order to comply with the relevant Treated product standard SATAS expects from you as the treater to proof compliance of the metal products by supporting documents e.g.,

- 1) Your order stating the standard to which the metal products must comply to.
- 2) Your supplier's invoice stating that product complies with the Standard,
- 3) Certificate of steel manufacturer with each consignment stating relevant characteristic values as addressed in SANS 3575.

All Manufacturers of these metal products known to SATAS will be notified accordingly.

Product compliance is the responsibility of the Treater and therefore the Treater must make sure that the metal products are in compliance. Please bring this to the attention of your metal product supplier and insist on the relevant supporting documents .

SATAS

**METAAL MERKERS en ENT PLATE
VIR SANS 288, 753, 754 en 457 PRODUKTE**

Die bogenoemde Standaard spesifiseer die vereistes van die metaal merkers en die teen bars plate wat by behandelde produkte gebruik word.

- 1) Materiaal: Weekstaal
- 2) Dikte :
Metaal merkers: 0,5mm
Teen bars plate: 1,2mm
- 3) Galvanisering: Klas Z275 soos in SANS 3757
Totaal albei vlakke 275gr/m² gemiddeld

Nie voldoening van die metaal produkte beteken dat die finale produk ook nie voldoen nie bv transmissie pale .

SATAS verwag van jou as Behandelaar om bewys van voldoening van die metaal produkte dmv stawende dokumente op rekord te h?.Bv.

- 1) Jou bestelling moet die Standaard waaraan produk moet voldoen spesifiseer.
- 2) Jou leweransier se faktuur moet duidelik toon dat die produk aan die spesifieke standaard voldoen.
- 3) Sertifikaat van metaal vervaardiger wat die relevante karakteristieke eienskappe van elke besending, soos in SANS 3575 aandui.

Alle vervaardigers van hierdie metaal produkte aan SATAS bekend, sal in kennis gestel word.

Voldoening van produk bly die Behandelaar se verantwoordelikheid en daarom elke Behandelaar seker maak dat die metaal produkte wel voldoen. Bring hierdie onder die aandag van jou metaal produk voorsiener en dring aan op die nodige stawende dokumente.
